A quick look at:

- [ATS– Second Certified Vendor](#)
- [Injury Surveillance Tool Launched](#)

ATS EXPORT ENGINE CERTIFIED

We are pleased to announce that ATS is now Export Engine Certified.

More information about ATS can be obtained from their website at www.athleticsoftware.com.

If you are using ATS for your EMR and would like to participate in the program, please let Megan McGrath know by going to our website and confirming participation under the “Athletic

Trainers” section.

If you are in the market for a new medical record system, be sure to look for our Export Engine Certified logo. Vendors displaying this logo are able to export injury surveillance information directly from their systems to the Datalys Center.

Our Mission:

To collect and translate— often in collaboration with others— sport participation and injuries into more effective programs, policies, rules and education aimed at preventing and mitigating and treating sport injuries more effectively

INJURY SURVEILLANCE TOOL NOW ALVILABLE

The new Injury Surveillance Tool has been designed to augment and facilitate your paper records; however, it is not a medical record system. The new Tool is designed as an injury incident report, which allows you to document injuries and provides printing and reporting features. In doing so, it also provides important injury information to the Datalys Center.

For those schools that saw the earlier demo version, you will notice some substantial changes in the new Tool. The basic functionality is the same (e.g.,

Rosters, Calendars, Injuries); however, because the new tool is entirely web-based, the look and feel of the product is different.

The Injury Surveillance Tool is available now; however, over the next two weeks, some additional features will be added:

- **Notes box:** A text box at the bottom of the Injury Information section to record your notes for that injury(s) associated with an Injury Event. As with the ISS system, this text box is limited to 4000 characters.

INJURY SURVEILLANCE TOOL NOW ALIVILABLE CONT.

- **Print Functions:** Allows you to print an incident report (a summary of Injury Events and the Injuries associated with that event) as well as athlete information for a travel binder. The print function generates a PDF file, which you can save and/or print as needed.

- **Calendar Wizard:** Allows you to enter multiple Activities on the calendar at one time.

As these updates are rolled out, it will

not affect your ability to access or use the Tool. As new features are added, we will make you aware of them by highlighting them on the welcome page.

If you would like to sign-up to demo or use the Injury Surveillance Tool, contact,

Megan McGrath
mmcgrath@datalycenter.org
(866) 807-0075.
